### DMX connection DMX 连接

DMX512 is widely used in lamp control, and can control up to 512 channels

On the last luminaire, a terminator is required for the DMX signal line. Solder a 120  $\Omega$ , 1/4W resistor between pin2 and pin3, install it into the 3-pin XLR plug and plug it into the DMX output port of the last lamp.

Use the XLR signal cable to connect the lamp, one end to the output port of the lamp, and the other end to the output port of the next lamp. The XLR signal cable can only be used in series, not parallel. DMX512 signal transmission speed is very fast. Damage to the signal line, weak welding, poor contact, etc., will affect signal transmission and cause the system to shut down.

When the power supply of a certain lamp is cut off, the connection of DMX output and input is bypassed, so that the connection of DMX line can be maintained.

Each lamp needs an address code, which can receive the information sent by the console, ranging from 0 to 512. The terminal of the system needs to be equipped with a terminator to reduce signal transmission errors.

#### DMX address code setting

When using a universal DMX console to control a lamp, please set the start address code (1 ~ 512) for the lamp first, so that the lamp can receive DMX signals.

Press the MENU button until the DMX address is displayed on the screen, press the ENTER button, and use the DOWN /UP button to change the DMX512 address. Press the ENTER button until the display stops flashing or it is automatically saved after one minute. To return to the main menu, press the MENU button.

DMX512 广泛用于灯具控制，最多可控制 512 个通道

最后一台灯具上，DMX 信号线需要安装一个终端器。焊接一个 120Ω, 1/4W 的电阻在 pin2 和 pin3 之间，装进 3-pin 的 XLR 插头之内并将它插在最后一盏灯的 DMX 输出口。

用 XLR 信号线连接灯具，一端接到灯具的输出口，另一端接到下一个灯具的输出口 XLR 信号线只能用于串联，不可以并联。DMX512 信号传输的速度很快。信号线损坏，焊接处不牢，接触不好等，都会影响信号传输，导致系统关闭。

当某台灯具的电源断电时，DMX 输出和输入的连接是旁通的，以致可以继续维持 DMX 线路的连通。

每盏灯都要一个地址码，能够接收控台发出的信息，范围在 0 - 512 之间，系统的终端需要装配一个终端器，以减少信号传输出现错误。

#### DMX 地址码设置

使用通用 DMX 控台控制灯具时，请先为灯具设置起始地址码 (1 ~ 512)，以便灯具能接收 DMX 信号。

按 MENU 按钮直到屏幕上显示 DMX 地址，按 ENTER 按钮，并使用 DOWN /UP 按钮改变 DMX512 地址。按 ENTER 按钮直到显示屏停止闪烁或一分钟后自动保存。退回主菜单请按 MENU 按钮。

### Safety introduction and product maintenance 安全介绍及产品保养

1. The power connection must be made by professionals.
2. Make sure that the use voltage is not higher or lower than the specified value in the instruction manual.
3. Confirm that the power cord is not cut or damaged by a sharp blade.
4. Be sure to disconnect the power supply when the lamp is not in use or before cleaning.
5. Only the plug is allowed to connect the power cord. When pulling out the plug, please do not pull the power cord forcibly.

6. Be careful when installing the lamps and avoid touching the bare wires, otherwise you will suffer a fatal electric shock.
7. Please do not look directly at the light source when the lamp is in use, otherwise your eyes will be hurt.
8. When choosing the installation location, please ensure that the lamp is not exposed to extreme heat, humidity or dust. The distance between the lamp and the illuminated object must exceed 0.5 meters. Make sure that there are no flammable and explosive materials within 0.5 meters.
9. Please use proper and safe wires to connect the lamps.
10. Please operate after familiarizing with the function of the lamp. Most of the damage to the lamps is caused by improper operation, so non-professionals are not allowed to operate the lamps. Do not shake the lamp at will, and do not operate it roughly.
11. Please do not modify the lamp at will. Doing so may cause short circuit, burning, electric shock, etc., and cause malfunction and damage of the lamp. The manufacturer does not provide warranty

- 1、要由专业人员进行电源连接。

In order to keep the product in good condition and prolong its service life, we recommend regular cleaning of the product. The number of cleaning depends on the operating frequency of the lamp and the surrounding environment:

1. Regularly clean the outer lens and inner lens of the product to prevent the light output of the product from being weakened due to the dust on the lens.
2. Clean the fan regularly. In addition, the dust cover of the machine should be removed for cleaning, because long-term use will cause dust to block the dust cover and affect the heat dissipation effect of the machine.
3. Every three months, a professional electrical engineer shall conduct a detailed circuit inspection of the product to ensure that the circuit contacts are in good condition to prevent the circuit contacts from aging due to overheating. Please be careful not to use damp linen, and never use alcohol or solvents for cleaning.

If users need any spare parts, please purchase them with the seller.

The company's products have good performance and complete packaging when they leave the factory. All users should strictly abide by the warnings and operating instructions stated above. Any damage caused by misuse is not covered by the company's warranty, and the dealers are not responsible for failures and problems caused by ignoring the operating manual.

为保持产品的良好状态，延长使用寿命，我们建议对产品进行常规的清洁。清洁次数视灯具的操作频度和周围的使用环境而定：

1. 定期对产品的外部透镜及内部透镜进行清洁，以防因透镜积尘而导致产品的光输出减弱。
2. 定期对风扇进行清洁，另外机器的防尘罩也要拆下来清洗，因为长时间的使用会导致灰尘堵塞防尘罩，而影响机器的散热效果。
3. 每三个月由专业的电气工程师对产品进行详细的电路检查，保证电路接点良好，以防由于过热导致电路接点老化。

请注意不要使用潮湿的麻布，千万不能使用酒精或者溶剂进行清洁。
